Brainstorming

Our Users: People who want their daily tasks to be organized and their historical records traceable.

1) School/College Students
2) Remote Workers
3) Business people
4) Professors/Teachers
5) Bodybuilders/Athletes
6) Celebrities
7) People who wants to change their life (like obese people)
8) Quite possible anyone with variable daily schedules

To be specific:

Maybe people who just wants to keep track of their daily life, and being able to log the highlights/lowlights of days.

Maybe people who wants to change their life by keep track of what they are doing (new habits and etc).

User Expectation

List of Features

Necessary Features:
1) Rapid Logging - 1 Week
2) Month and Date Panes - 3 Days
3) Different Types of Bullets - 2 days
4) Responsive Design - Ongoing (worked on parallely)
5) Tags - 2 Days
6) Special List for Important Ongoing Tasks with no fixed due date - 1 Week
7) Session Management - Ongoing
8) Import images - 3 Days
9) Guide to use App on Landing Page - 2 Days

Optional features:
1) Customized templates
2) Export to pdf
3) Labels to generate weekly/monthly summary, including user-created and auto-generated
4) Login and database
5) Drag elements around for personalized layouts
6) 2 themes: dark/bright
7) Disabilities support
8) Handwriting
9) Static panel to jump around sections
10) Pre-built templates

customized journals - Proposed Feature: Custom Designs and Sketches can be added with custom fonts. (User Personalization)

Different types of bullets

RYDER CARROL'S BULLET JOURNALING METHOD:
• TASK
X TASK COMPLETE
— NOTE
O EVENT
▷ TASK MOVED
△ MEMORY
! IMPORTANT
• DELETE

Some idea pieces

Tracking habits/highlights/lowlights/task not done

Simple, Clean UI that's easy for users; Intuitive Design

Basic feature: bullets, daily task, symbol, keep things short and simple.

Can use color and shape to boost user experience

Different types of Bullets to denote different meanings for the tasks

Color coding, Important

Secret Journals

Specific Functional Explanation

Label:
Automatical generate / user create themselves (primarily)
// Can show the label of the day/month/year
User can search for labels to highlight days with these labels.
Labels will be automatically shown beside the days of the week
// Label suggestion for frequent keywords
Small button to expand and show labels
Delete keywords from choices after user actively wants to

Different looking for dates with "important" stuffs(maybe a different color or a special icon)

People can see the weekly/monthly/yearly overview of summaries for days with certain labels

Interface design

Sample Desktop Design
Expanded Mode: display every bullet journals in each day

Timeline Mode: Bullet Journals are hidden for faster scroll. Each day of the week has the labels shown, and we can click on any day to switch to expanded mode

Responsive Design (For Screens with lesser Width - Mobile/Tablet)
Top Pane with 7 Days of the Week that can be clicked/touched to shift focus on to that
By sliding down the top pane, the days of the entire month can be seen.

A static panel that can jump between sessions of the journal
Tags are used to better organise the different types of points taken down in the different days. By selecting the tag, you can view/modify the related bullets.

People can choose what part of the journal they want to print out as PDF

PDF Mockup(Work,Excercise tags corresponds to static panels shown in the left)

Possible Layout with Two Left Navigation Panes
Left Most - Months with a Year Selection Option on the Top
Second Pane - Dates of the Month that is scrollable

Example Journal Note populated with different bullets, text and pictures

Appearance/ Layout:

Yearly/ Monthly/Weekly/ Daily preview (maybe do some smooth transition like zoom in/out)

Maybe 2 themes
Bright/Dark
